

BUILT TO LAST, IN AMERICA

Water-saving device

WILLOUGHBY WUCC-3010

Combi Controller

Take control of inmate water usage! Willoughby's electronic combi controller can limit the flow time for each lavatory valve and the number of flushes within a 60-minute time period—saving a facility time, water, and money. This stand-alone, non-networked unit does not require a PC.

Maximum Control

Each combi controller can restrict toilet flushing from 1 to 8 times within a 60-minute time period.

Restrict the Flow

Water and money going down the drain? Restrict the amount of water inmates can use with the turn of a knob.

Nuisance Flushing Eliminated

Our device can also restrict the number of flushes and the amount of time between each flush for maximum control.

WILLOUGHBY

Combi control

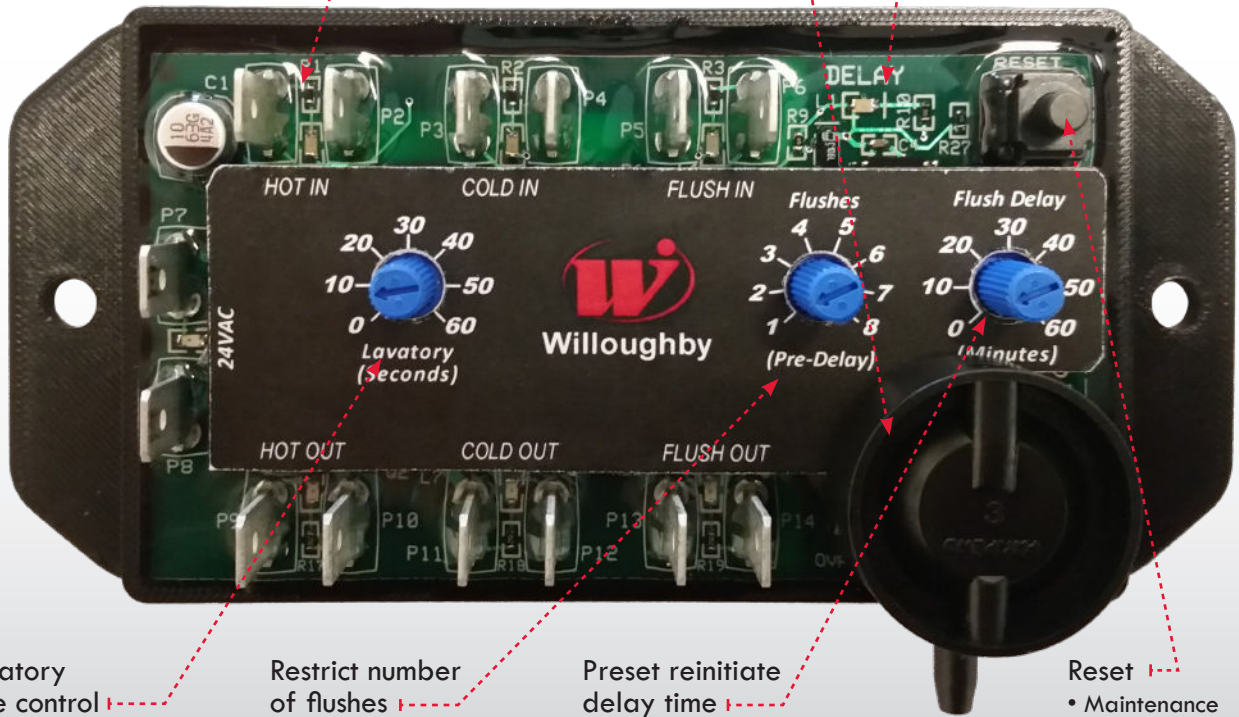

- Each device can control up to 1 electronic hot and cold lavatory valve and 1 electronic flush valve.

Overflow protection

- Detects water level in bowl to help prevent toilet bowl overflows.

LED lights

- Indicate that a lock-out situation has occurred.

Lavatory time control

- Limit run time from 10 to 60 seconds.

Restrict number of flushes

- Choose between 1 and 8 flushes before lockout delay.

Preset reinitiate delay time

- After maximum number of flushes is reached, toilet won't flush until delay time has passed.

Reset

- Maintenance personnel can easily reset functionality from the chase.

Now we're even easier to specify:

Product **MasterSpec**

AUTODESK **REVIT**

Technical Specification: Model WUCC-3010
 Standard: 4.75" wide x 0.3125" deep x 2.25" tall
 Power requirement: 24VAC
