

BUILT TO LAST, IN AMERICA

WILLOUGHBY LRFD SERIES

Ligature-Resistant Floor Drain

The LRFD is an extremely durable ligature-resistant floor drain for security and behavioral environments

Purpose Built

We consulted with leading behavioral healthcare professionals to create this ligature-resistant drain—we didn't simply retrofit an existing model.

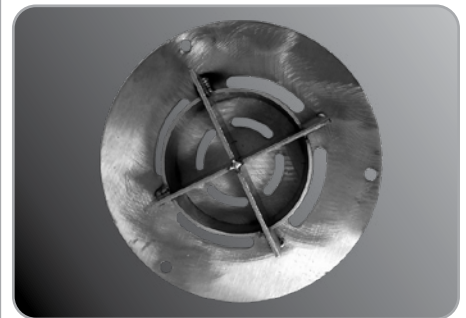

Built to Last

The Willoughby LRFD line of round floor drains are fabricated from 7-gauge, Type 304 stainless steel and utilizes an industry-standard cast iron drain body.

Ligature Resistant

Each drain cover has been designed on the underside to minimize its use as a tie-off point for a person in a behavioral-type facility, increasing safety and peace of mind.
