

BUILT TO LAST, IN AMERICA

Water-saving device

WILLOUGHBY WUFCB-5200

BATTERY-OPERATED Flush Controller

Economically manage up to 2 toilets and take control of inmate water usage! Willoughby's electronic flush controller can limit the number of flushes per hour saving maintenance time, water, and money. This stand-alone, battery operated unit is field adjustable—no AC power or PC required!

Maximum Control

Each flush controller can restrict toilet flushing from 1 to 8 times per hour.

Restrict the Flow

Water and money going down the drain? Restrict the amount of water inmates can use with the turn of a knob.

Nuisance Flushing Eliminated

Our device can also restrict the number of flushes per hour and the amount of time between each flush for maximum control.

WILLOUGHBY

Reset

- Maintenance personnel can easily reset the functionality from the chase.

Preset re-initiate delay time

- After maximum number of flushes is reached, toilet won't flush until delay time has passed.

Flush control

- Each device can control two electronic flush valves.

Water-resistant enclosure

Hinged door for easy maintenance access

Restrict flushes per hour

- Choose between 1 and 8 flushes before lockout delay.

Battery powered

- Controller uses 12 AA batteries (included) for operation.

Water-saving device

Now we're even easier to specify:

Product **MasterSpec**
